

## HTML and CSS

### Part 1:

Create a page where users can “login” with a username and password.

Create another page where users can “register” by providing a username, password, first name, last name, and email address. Incorporate dropdown selections, numerical inputs, and checkboxes/radio buttons into the registration page as well.

Create a page which displays your three favorite websites, with details about and links to each.

Add a navigation bar to each page which allows the user to move between all three.

### Part 2:

Create an external stylesheet with CSS which does the following:

- centered login/registration panels
- rounded edges on panels
- background image or color on all pages
- any other styling you see fit to add (be creative)

Due: 9am March. 20
